

## Centrica Energy Trading Ref. 19292

Hello, my name is Maribel Damm, I'm Mexican and Danish citizen, I've two beautiful young daughters and a really great husband that cooks quite good.

My career life started at Ericsson, Ericsson was a cross-border company and ahead of its time, I really started with great values, like respect to other people and cultures, teamwork, and culture of reviews, quality and lot of documentation. I've continued to enjoy working with people for around the world in Telia and MJK Automation.

Westergaard (now Metier) and MJK Automation, I got more focus for the customer. At Westergaard, I had the opportunity to work with Politikken and MJK Automation with Service Technician. It's a pleasure to see that we can simplify using the company's services/products.

Ok, but what I can do?

- I think that I'm amazing troubleshooter, I'd trouble shoot, mobile ex-change, tivoli IBM, Bluetooth, Microsoft 365, comp port, protocols, assembler, visual basic, WPF, etc.
- Protocols, from requirement specification to how you build the message: What are the features, you can get from it (example HART), Diagnosis, Calibration, Logs, Configuration.
- Programming, at Ericsson it was a proprietary software called Plex, but I was working also with assembler, Weestergaard with Jython, XML, HTML, but also with LDAP and middleware. MJK has been mostly with WPF, JAVA or visual basic or whatever it is needed (Code Signing, InstallShield, VS Installer, etc).

What I do now?

- Configuration, Monitoring Software for controllers and sensors, and just started with test automation labview & teststand.

Why I'm looking job at Centrica?

- Because Centrica promotes equality, and excellent place to work, focus for sustainability and customer's needs, and I'm really wish to work with other software people.

Free time and hobbies?

My family is the most important, but I'm enjoying going out with my friends, I like nature, birdwatching, hiking, winterbathing. I like also to keep me in shape with Pilates and Yoga. And when I'm sad I like to draw or paint.

That it is me.

Kind Regards/Maribel Damm
